

Clinical & Medical Affairs

'Right Line, Right Now!'

ARROW® Vascular Access Procedural Workshop Program

The Clinical and Medical Affairs team at Teleflex are delighted to invite you to attend our 'Right Line, Right Now!' vascular access procedural pre-conference workshop.

Obtaining appropriate, successful and effective vascular access is essential to provide optimum patient care within numerous clinical settings, including emergent, trauma and continuing care situations. This course, which will focus specifically on continuing care, is relevant for nurses working in critical care areas and aims to provide an insight into the importance of selecting the right line, for the right patient, at the right time.

A short lecture providing an overview of vascular device selection and vessel health preservation will be followed by a series of workshops intended to provide the attendee with the opportunity to develop their knowledge and skills within this particular topic.

This course is supported by an experienced clinical faculty, sharing their knowledge and skills within this interactive and engaging workshop.

Course Content: (subject to change)

- Introductory Lecture
- Workshop 1: Compliance & Risk Reduction
- Workshop 2: Ultrasound Assessment
- Workshop 3: Needling Techniques
- Workshop 4: PICC and Midline Insertion
