

Overview

- Service background
- Critical Care Rehab Pathway – the Grand Scheme
- Preliminary Results
- Challenges
- What's next?

Background

- **Departmental Transformation programme**
 - CQC report April 2015 highlighted concerns re: responsiveness to admissions, Outreach cover and pre-admission waits in theatre recovery
 - Merger of two local hospitals required restructuring of service
 - Higher than national average critical care length of stay [10 days]
- **Non compliant with GPICS and NICE CG83 recommendations**

NICE

National Institute for
Health and Care Excellence

Preliminary Results to Date

NICE CG83 >

Feb 2017

April 2018

Quality Standard 158

Statement 1 – risks assessed and goals set within 4 days

Non compliant

Compliant

Challenges

- Workforce stability
- Incompatible electronic systems – iPortal/PDMS
- Change fatigue
- Inter-professional communication
- Workload: 1 WTE Rehab Coordinator

What's next....

- Review pathway with service user involvement
- Fine tune patient diaries processes
- Ratify new Pain, Agitation, Delirium and Sleep guidelines
- Rehab education day for preceptees

- Finalise rehab prescription – integration of data from PDMS & iPortal
- Patient leaflets – Tailored UHNM Critical Care leaflets, ICU Steps booklet
- Ward based education programme

- Set up local ICU Steps patient support group
- Review localisation of <http://www.criticalcarerecovery.com/>
