

Learning from medication incidents in Adult Critical Care

Mary Beckenham

Mary.beckenham@nuh.nhs.uk

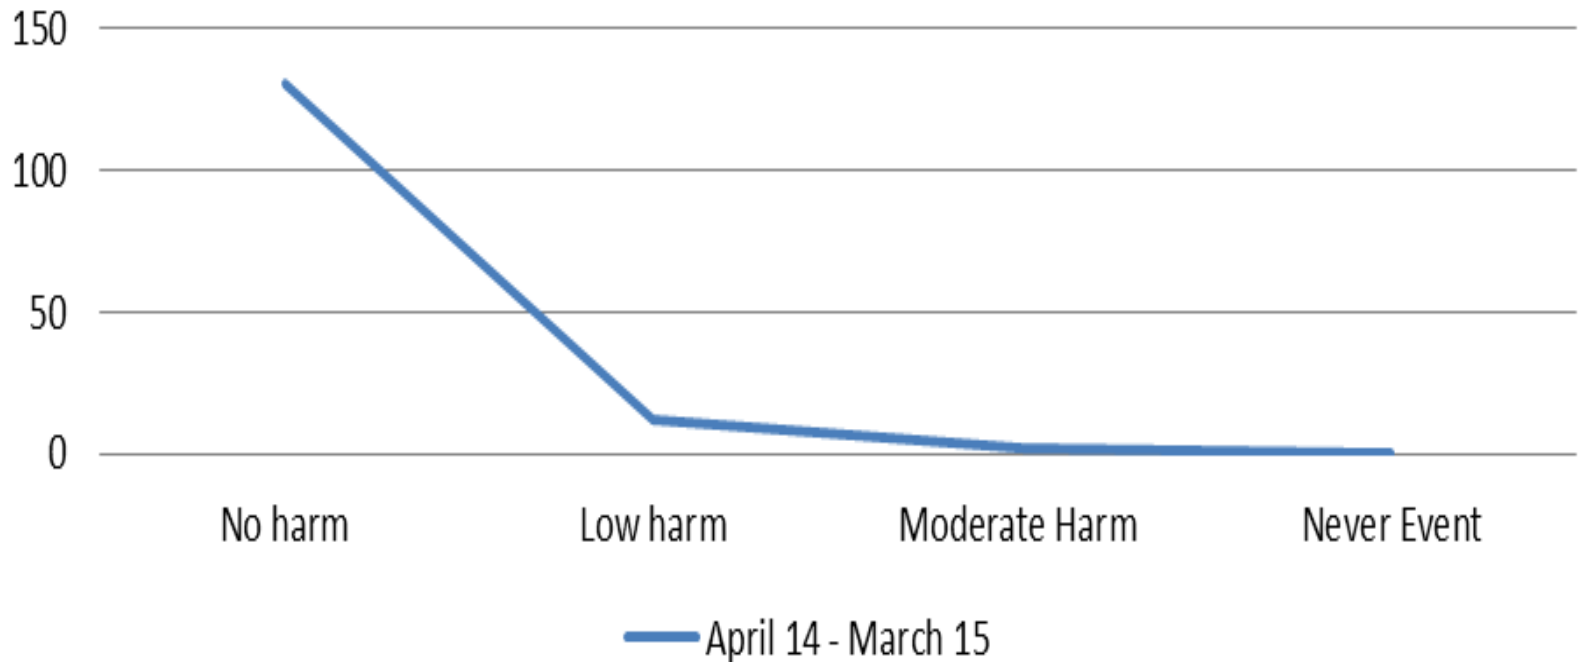

Aim

- To understand why medication errors occur
- Identify processes to improve medication errors
- Develop learning
- Reduce recurring themes.

**A high reporting rate
should not be interpreted
as an unsafe organisation,
and may actually
represent a culture of
greater openness.**

Medication incidents

Medicine Incidents April 14 - March 15

Method

- Review Datix incidents
- Review investigations involving medication
- Identify any themes
- Engage the multi professional team
- Introduce Medicines Champions
- Use of handover tool
- Evaluation

Adult Critical Care 14 Day Handover Communication Tool

Date: 26th January 2015

This information should be handed over by the Nurse In Charge to all nursing staff at the start of each shift

Subject	Additional Information	Day	Handed Over By Name/signature (NiC)	Handed Over By Name/signature (NiC)
Medicines Right patient	<ul style="list-style-type: none"> Identify patient correctly; talk to them Ensure ID band matches unique identifying number Check name & drug card matches ID band 	Monday 26 th		
		Tuesday 27 th		
Medicines Right Day, Time, Drug & Indication	<ul style="list-style-type: none"> Check all pages in drug chart, including 'once only' & 'as required' & additional charts Prescription must be legible & signed 	Wednesday 28 th		
		Thursday 29 th		
Medicines Contraindications	<ul style="list-style-type: none"> Check allergy box on front of chart is completed & signed before administering drugs If allergy present – check ID band is RED 	Friday 30 th		
		Saturday 31 st		
Medicines Second Checking	<ul style="list-style-type: none"> Responsibilities for 'second checking' are equal for both practitioners. As part of accountability handover take drug chart to infusions & follow lines. 	Sunday 1 st		
		<p>Nurse in Charge Message: Please discuss with nurse in charge / Team Leader before asking for medical advice.</p>		

Team Leader Responsibilities – To be delivered to Team Leaders after Handover in the clinical areas

1. (Information Giving) Ensure bedside checks are completed
2. (Check and Challenge) Ensure double signing on drugs chart & 24 hour chart as necessary
3. Ensure appropriate ID band on patients

Adult Critical Care 14 Day Handover Communication Tool

Date: 9th February 2015

This information should be handed over by the Nurse In Charge to all nursing staff at the start of each shift

Subject	Additional Information	Day	Handed Over By Name/signature (NiC)	Handed Over By Name/signature (NiC)
Medicines Infusions: Prescribed	<ul style="list-style-type: none"> Ensure infusions are prescribed Utilise bedside pharmacy folders to check Plan prescribing eg have enough crystalloid for night through to morning 	Monday 16 th		
		Tuesday 17 th		
Medicines Infusions: Equipment	<ul style="list-style-type: none"> Ensure correct use of pumps at bedside Use of DERS on Alaris infusion pump If on inotropes ensure line not aspirated by Dr for Blood Cultures 	Wednesday 18 th		
		Thursday 19 th		
Medicines Infusions: Timely	<ul style="list-style-type: none"> Ensure that patient safety is not compromised eg if fitting give drugs not continue washing! Ensure all drugs are given in a timely fashion 	Friday 20 th		
		Saturday 21 st		
Medicines Second Checking	<ul style="list-style-type: none"> Responsibilities for 'second checking' are equal for both practitioners. As part of accountability handover take drug chart to infusions & follow lines. 	Sunday 22 nd		
		<p>Nurse in Charge Message: Please discuss with nurse in charge / Team Leader before asking for medical advice.</p>		

Team Leader Responsibilities – To be delivered to Team Leaders after Handover in the clinical areas

1. (Information Giving) Ensure bedside checks are completed
2. (Organisation) Ensure appropriate ID band on patients
3. (Check and Challenge) Ensure double signing on drugs chart & 24 hour chart as necessary

Adult Critical Care 14 Day Handover Communication Tool

Date: 23rd February 2015

This information should be handed over by the Nurse In Charge to all nursing staff at the start of each shift				
Subject	Additional Information	Day	Handed Over By Name/signature (NiC)	Handed Over By Name/signature (NiC)
Medicines	<ul style="list-style-type: none"> Ensure pumps are appropriately set up for infusions Use of DERS Prime lines through pumps to take up 'slack' 	Monday 23rd		
		Tuesday 24th		
Infusions: Pumps		Wednesday 25th		
		Thursday 26th		
Medicines	<ul style="list-style-type: none"> Ensure correct use of non pvc lines for drugs e.g. nimodipine When changing infusion rate, ensure you follow the line through from the infusion to the correct pump 	Friday 27th		
		Saturday 28th		
Infusions: Lines		Monday 23rd		
		Tuesday 24th		
Medicines	<ul style="list-style-type: none"> Ensure infusions are changed prior to expiry – remember some drugs only have 24hr life Ensure infusions are made up in time before they run out Don't leave infusions in bed area for colleague to put it up – if you made it, put it up with 2nd check 	Wednesday 25th		
		Thursday 26th		
Infusions		Friday 27th		
		Saturday 28th		
Medicines	<ul style="list-style-type: none"> Responsibilities for 'second checking' are equal for both practitioners. As part of accountability handover take drug chart to infusions & follow lines. 	Monday 23rd		
		Tuesday 24th		
Second Checking		Wednesday 25th		
		Thursday 26th		
			Nurse in Charge Message: Please discuss with nurse in charge / Team Leader before asking for medical advice.	

Team Leader Responsibilities – To be delivered to Team Leaders after Handover in the clinical areas

1. (Information Giving) Ensure bedside checks are completed
2. (Organisation) Ensure appropriate ID band on patients

Daily Safety Walk Round

CATEGORIES	PROMPTS	
Drug Chart	<ul style="list-style-type: none"> • Name, DOB, Hosp no, Ward, Allergy • Clear & legible 	<ul style="list-style-type: none"> • Review dates • Pharmacy check
24 hr chart	<ul style="list-style-type: none"> • Fluid balance • Infusion rates signed 	<ul style="list-style-type: none"> • Drug concentration completed • Matches prescription
Medicines Management Chart	<ul style="list-style-type: none"> • Omissions completed & signed • Plan in place to get drugs 	<ul style="list-style-type: none"> • Critical drugs list – importance of
Infusions	<ul style="list-style-type: none"> • Lines labelled • DERS programmed 	<ul style="list-style-type: none"> • 2 witness check • Drug compatibility
Controlled Drugs	<ul style="list-style-type: none"> • 2 signatures, 1 must be a registered practitioner to witness the preparation & administration 	<ul style="list-style-type: none"> • Patients name, date, time • Enter correct CD balance in register
Education	<ul style="list-style-type: none"> • IV pack completed • Team Leader support • Pharmacist availability 	<ul style="list-style-type: none"> • Pharmacist availability
Aware when a drug error occurs & is able to report on datix	<ul style="list-style-type: none"> • Check patient observations & condition • Inform Nurse in Charge • Inform medical staff 	<ul style="list-style-type: none"> • Report on datix (check before submitting with NIC/B7) • Document all of the above in notes.
5 rights in administration	<ul style="list-style-type: none"> • Patient • Medicine • Date & Time 	<ul style="list-style-type: none"> • Route • Dosage
Unavailable medication	<ul style="list-style-type: none"> • Double check not available on ward • Contact pharmacy to see if available 	<ul style="list-style-type: none"> • If on drugs critical list, stress the importance of to pharmacy • Record on Medicines management chart reason for delay/omission

Next steps improvement plan

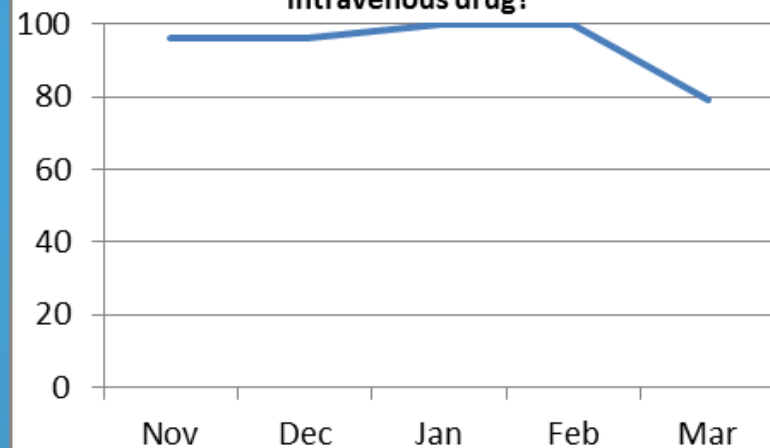

- Pilot Audit (observational)
- Reduce Non compliance with policy
- Raise awareness of common themes
- Reiterate the 2nd checking drugs process
- Emphasise importance of CD's & infusion rate changes
- Ensure improvements are completed by same 2 nurses

Findings

Has the controlled drug been drawn up, made up and administered by the same two nurses?

Did the two nurses perform the 5 rights of drug administration before administering the Intravenous drug?

Registered Audit

Level of compliance required 100%

Blue = AICU
Red = Critical Care
Green = E12

Current progress

Re audit June 17 – November 17

Learning points

- Multi professional engagement is vital
- Short messages at handover
- Reinforce best practice
- Measure improvement by audit
- Don't expect 100% in your results; the unexpected can occur
- Medicines Champions impact
- Continuous learning

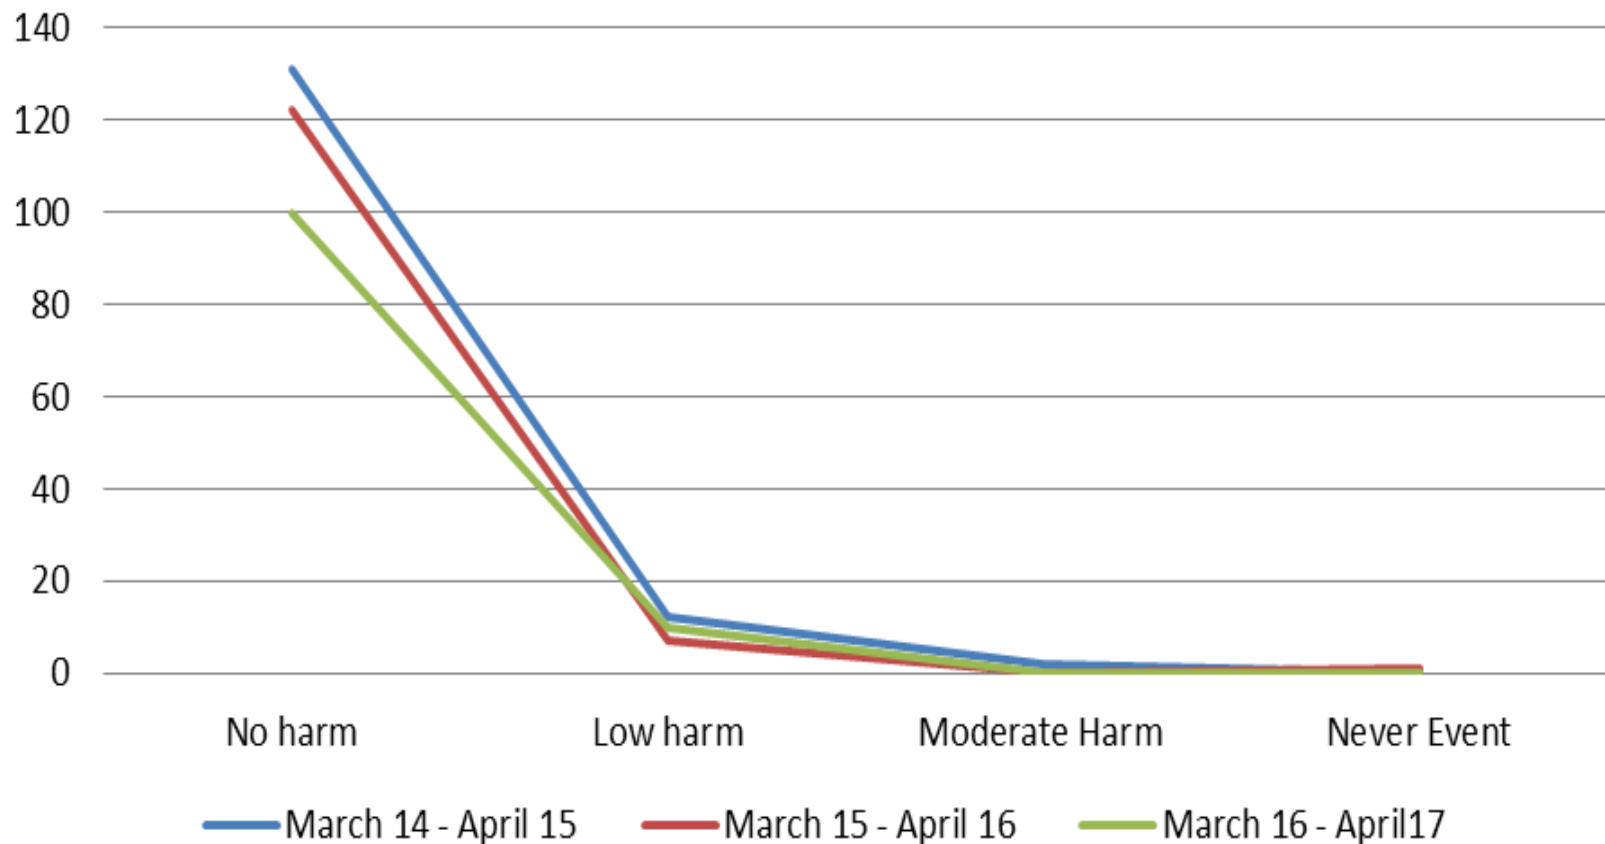

Medicines incidents 3 years

Number of Medicines Incidents

Level harm over 3 years

Number of Medicine Incidents

Conclusion

- Ongoing work
- Reduction in incidents reported
- Reduction in level of harm
- Harm not number of incidents
- Open culture
- No complaints from relatives
