

BACCN Representative on Project Group/Advisory Board/Collaborative Work

Work Title Competency CC3N education group representative Ann Price

Scope of Work (e.g. background of project/expectations of involvement)
Competency development and standardization of ICU education

Date(s) Start: 26.11.2020 Once off: no

Feedback (to include/highlight any pertinent issues for the attention/action of the BACCN National Board)

Mainly discussion about all the training available related to Covid/ leadership/ wellbeing. Forwarded all the flyers to Professional leads to disseminate as relevant. Some of these have central funding, are virtual, and so free to staff.

Looking at a 'passport' for surge staff as record of training completed to avoid duplication. Sent this to Professional leads for any comments which are due 3rd December 2020 please.

Planning a competency for intermittent haemodialysis as some units offer this service rather than CVVH. Updating competencies delayed as people busy with Covid situation.

Qualification in specialism hopes to commence in London early next year.
Still looking for platform that can support online competency document record.
London training learning collaborative (LTLC) has free online resources to access.

Next meeting TBC
