CRITICAL CARE DEPARTMENT

Guy's & St Thomas' is one of the largest NHS Trusts in the UK, with over 14,000 staff, an annual turnover of more than £1.2 billion and 1.6 million patient contacts a year.

Our hospitals have a long and proud history, dating back almost 900 years and have been at the forefront of medical progress and innovation since they were founded. We continue to build on these traditions and have a reputation for clinical, teaching & research excellence.

The Critical Care Department is one of the largest in the UK, consisting of more than 100 beds. Our patients are admitted from a range of specialties, including medicine & surgery, cardiac, hematology, vascular, thoracic, renal, and ENT.

As a tertiary referral center, it is nationally and internationally renowned for its services, with advanced therapies including renal replacement therapy, plasma exchange, advanced respiratory and ventilator support such as ECMO.
