

## **VETERINARY CRITICAL CARE REGION**

**PRESENT:**

**Transfusions: Red Cells and Platelets**

**Thursday 20<sup>th</sup> July 19:00 – 20:00**

**Online webinar presented by  
Helen Rooney**

Erythrocytes and thrombocytes are critical for oxygenation and haemostasis, and deficiencies of these cells are common in our critically ill veterinary patients. Helen will talk us through the importance of these cells and the conditions that cause and the consequences of deficiencies and importantly how blood products can be used to help support these patients.

**Members: Free  
Non – members: £5**

**(To become a member of the BACCN [Click here](#))**

**A certificate of attendance will be issued for Registered (human centered) nurses. To meet NMC re-validation, we recommend completing a written reflective account. Details here [NMC requirements](#)**
